

PDF Version 2.0 Test Document

Weave-CLI PDF Extraction Test Document. This document tests PDF text extraction across different PDF versions and types.

Section 1: Basic Text. The quick brown fox jumps over the lazy dog. This sentence contains every letter of the English alphabet and is commonly used for font testing.

Section 2: Technical Content. Vector databases store high-dimensional embeddings for similarity search. Common operations include insert, query, delete, and update. Supported backends include Weaviate, Milvus, Chroma, Qdrant, OpenSearch, and Neo4j.

Section 3: Data Processing. PDF extraction involves parsing the document structure, extracting text streams, identifying image objects, and reconstructing the reading order. Chunk sizes affect downstream embedding quality.

Section 4: Quality Assurance. Automated testing validates that extraction produces consistent, complete results across PDF versions. Metadata preservation ensures traceability back to source documents.
